Two-sided space saver

Easy to place anywhere in the store, e-Visio offers a massive display area for a modest footprint.

Changing demographics and busy lifestyles are shifting shopping habits. While grocery stores are getting smaller, choice is certainly not – on the contrary! Viessmann has responded to the convenience environment with e-Visio, a two-sided space saver that combines two remote multidecks into one compact cabinet. In contrast to a traditional back-to-back multideck set up, e-Visio gives entirely new options for exploring unique store layouts and concepts. Its unique design saves up to 30% of floor space.

With a light see-through structure and modern looks, e-Visio's 360° glass surface and depth of 1460 mm provide the largest possible total display area and a huge choice of options for a given space.

Lowering the life cycle costs

e-Visio is up to 40% faster to install than a traditional, one-sided multideck and requires less plumbing. Viessmann's innovative patented e-ncore air curtain technology, all glass doors and EC fans mean that e-Visio is energy efficient; superior temperature performance maintains optimal conditions and minimises food waste.

Choose e-Visio for

- New e-ncore technology with patented air curtain
- Optimised usage of floor space
- Maximum product visibility
- More options for store layout planning
- 40% faster to install

Technical specifications

External length (mm)	1250, 2500
External height (mm)	2010, 2210
External depth (mm)	1460
Temperature range	+0 to +2 °C and +2 to +4 °C
Refrigerants	R404A, R744 (CO ₂)

e-Visio-MD30-148-201

e-Visio-MD30-148-221

Double glass doors

Standard equipment

- Patented air curtain technology
- Evaporator and expansion valve for R404A and R744 (CO₂)
- ESM fans
- Double glass doors
- Defrost water outlet pipe in the cabinet length, external diameter 40mm
- Canopy lighting, T5 tubes
- Removable honeycomb
- Electrical box on top of the cabinet
- Easy evaporator access for maintenance work

Optional accessories

Acrylic front riser

Grid divider for bottom shelf

Hook rail with shelf

Acrylic divider for shelf

Corner cover

- Thermometer
- LED lights
- Shelf consoles 300-450mm, three different positions 0°, 10°, 20°
- Expansion valve for other refrigerants
- Shelf lights
- Defrost heater
- Partition end panel
- Multiplexing kit
- Holders, dividers, hooks
- Adaptive control kit
- Ticket strip holder
- Bumper trim for end panel
- Corner covers

Benefits

e-Visio maximises product visibility in the centre of the store and brings products closer to the customers.

- 1 New patented air curtain
- 2 30% less floor space needed
- 3 360° glass surface for maximum product visibility
- 4 New store layout options
- 5 40% less time needed for installation

Success story: Urban Deli puts the environment and innovation first

Hot new chain Urban Deli has opened the doors of its flagship in Stockholm.

CEO Johannes Andvaller describes Urban Deli as a mix of a food shop, market hall, restaurant and bakery; a comprehensive concept allowing customers to eat a meal or have a glass of wine over a platter of cold cuts while composing a shopping list for cheeses, fresh fish, vegetables and dairy products they can then buy for dinner at home.

The concept places great demands on presentation and flexibility, as expectations and operational areas vary from morning to late evening. It is incredibly important that the style-conscious restaurant spaces overlap the airy shop section in a natural, user-friendly way. For example, a refrigerated counter is used in 'retail mode' to sell shellfish during the day and is converted in the evening to a shellfish bar where guests can also enjoy a glass of wine.

Urban Deli has an ambition to have as small an environmental footprint as possible. This principle extended to their choice of refrigerator manufacturer and in particular to the use of the most environmentally friendly propellant available, CO₂.

Jesper Weidnitz, concept developer at Urban Deli, explains that Viessmann was the natural supplier, with its offer of smart environmental thinking and modern innovation, both entirely in line with the positioning Urban Deli set out to create. Jesper Weidnitz goes on to say that the key factor in the company's decision-making process was Viessmann's ability to closely listen and respond to customer input during the design process.

Thanks to close collaboration with Urban Deli and its concept developers, Viessmann has been able to effectively create the best combination of functionality, environmental friendliness and product presentation in the newly opened market hall.

In Urban Deli's Sveavagen flagship store, sales have been boosted since the arrival of a new double-sided e-Visio and a semi-vertical Inspi line, also from Viessmann. Fresh goods are displayed in a smart Viessmann Gusto service counter line.
